PNEUMATIC HAND AIR TOOL

Perfect for easier application of ratchet-type hose clamps

Features and Benefits:

- Allows for a semi-automated process which increases speed over manual tools.
- Adjustable jaws allow tool to accommodate a wide range of Heyco Hose Clamps.
- Activated by hand lever reducing stress on the hand and the risk of carpal tunnel syndrome associated with repetitive assembly.
- Operates only when lever is depressed.
- Tool operates on standard shop air.

EFC also offers a wide range of Nylon Hose Clamps by Heyco!

Features and Benefits:

- Lockit Hose Clamps have a double row of teeth for a more secure grip and the retainer clip allows the clamp to be pre-positioned on the hose before final installation.
- Available in ranges as small as .250" to as large as 2.375" and are available in 6/6 or glass filled Nylon.
- Reusable and can be removed without cutting the clamp.
- Lightweight yet resist corrosion, salt water, weak acids, greases and common solvents.
