

# Solutions

**Highly Versatile, Plastic Trim Clip Panel Fastener**  
*Perfect for Metal or Plastic Garnish Trim and Access Panels*

**Riblok™ by ITW Engineered Fasteners**

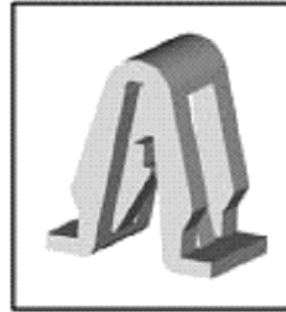

**Attach to Metal Panels**

- or -

**Attach to Plastic Panels**

RIBLOK™ built for metal panels have thinner legs to provide flexibility both into and out of the panel.

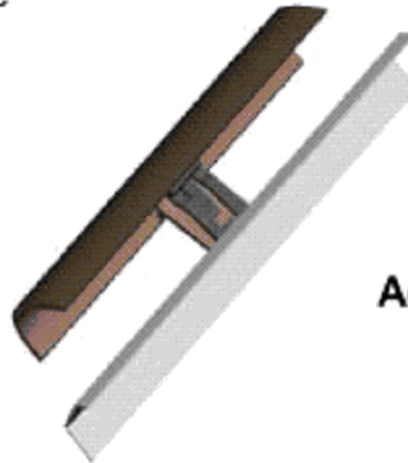

RIBLOK™ designed for use in plastic panels have thicker legs for customized performance.

## Primary Advantages

- Reduces Buzz, Squeak, & Rattle
- Corrosion Resistant
- Easy Hand Assembly
- Serviceable or Non-Serviceable
- Metal or Plastic Substrate Use

Flexible tabs on both versions allow the RIBLOK™ to attach to the post or rib of trim panels through molded or punched access holes.

Engineered plastic resin construction eliminates corrosion problems associated with metal clips.

## Additional Advantages

- Minimal Installation Effort
- Customized Retention
- Corrosion Resistant
- Molded as One-piece
- Accepts Various Panels
- Anti-vibration Design

With a fully staffed engineering and prototype center, ITW Engineered Fasteners can turn ideas into reality.

Very low installation efforts onto trim panels simplifies the assembly process.
