## Orlock™ Rivets

***Perfect for heavy duty structural applications!***

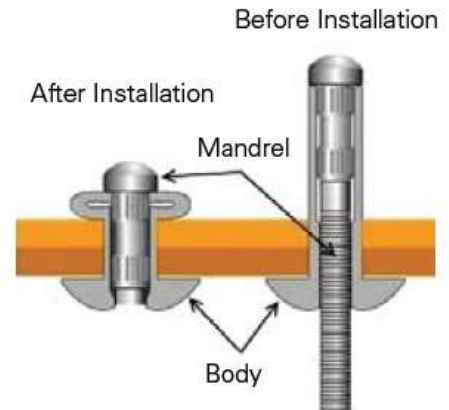

Orlock™ rivets are ideal for heavy duty structural applications due to their unique double locking system and exceptional shear and tensile strengths.

### Features and Benefits:

- Double Locking System
- Secure, vibration resistant joint
- Enhances water and vibration resistant properties
- Positively Retained Stem
- Large blind side bearing area – spreads clamp load over a large area
- Ideal for thin, brittle and soft sheet materials
- Grip ranges up to 39.5 mm
- Wide range of head types (P, L, X, K)

#### Materials:

- Steel
- Aluminum Alloy
- Stainless Steel

Optional decorative caps available to enhance corrosion and water resistance properties and complement joint material color.

Truck Box Aluminum Frame

### Assembly Applications:
