FOR IMMEDIATE RELEASE

EFC International Now Stocking Delta PT® Screws

February 20, 2012 - St. Louis, MO - EFC International, a leading provider of specialty engineered fastener component parts, now has stock on the latest PT® screw development, the Delta PT®, which provides the optimum thread forming in plastic without any material damage. The Delta PT® screw provides better clamp loads and increased joint life in a wide range of plastic materials.

The Delta PT® screw offers improved vibrational safety, improved dynamic safety by new shear area, and high clamp load at smaller contact pressure by increased flank engagement.

EFC offers professional engineering support and samples. Delta PT® screw configurations are available in range diameters of 1.8mm to 10mm, lengths of 3mm – 100mm and any head style. Recommended drives are TORX Plus® TORX® ACR® Phillips II® Phillips Square-Drive® Quadrex® Type 1A, and Type 1.

EFC International is an ISO 9001:2008-certified leading provider of specialty metal and plastic components, fasteners, and clamping technologies to OEM and Distributor markets. As a Master Distributor, EFC offers its customers a “One Source Solution” for engineered specialty fasteners and components, provides a high level of engineering and technical product support, and has strategically located, full-service warehouses throughout North America as well as an E-commerce site for on-line sales of product.

EFC is a Master Distributor for Semblex, ITW CIP, ARaymond-Tinnerman, ITW Engineered Fasteners, Oetiker, ITW Tekfast, Kipp, Heyco, and more!
