## TorqueFox™ Battery Tool

*Perfect for reducing labor costs and ergonomic installation of threaded inserts!*

### Features & Benefits:

- Sets M4-M10 (A-K, A-L, A-H Series). Would require 4 ARO tools.
- No airlines to drag around
- Ergonomics better than current tools – no wrist torque, balanced better
- Quieter than air tools
- Process security – audible and visual verification
- Bright LED to illuminate installation hole
- Incrementally adjustable (90 settings) within 5 sizes either English or Metric
- Good/No Good electric readout after each install
- Battery “Brain” – RFID chip prevents overcharging and monitors energy level stopping any action at 20% of battery life. No dropping off of power, no loose inserts.
- Installation is controlled electrically – not mechanically.
- After 1.5 million cycles tested no drop in Newton meter readings.
- Single trigger operation
- Highly portable
- German engineered and manufactured on industrial Makita platform.
- One charge sets from 200 to 400 nuts depending on material.
