

Engineering Solutions

Twin Material Pipe Clip

Perfect for vibration clamping!

New designed system keeps calm, even when it's almighty hot!

Application

- Acoustically decoupled line systems, e.g. hydraulic, brake and fuel lines

Advantages

- No relaxation of pipe clip
- Dimensional Stability
- High temperature resistance
- Vibration absorbing
- Improved acoustic properties
Reduction of background noises during drive

Technical Data

- Temperature resistance up to 160° C
- 2 components – sandwich-type structure
Hard component: Ensure required forces met
Soft component: Guidance of pipes
- Low Insertion forces (into stud)
- High Pull Out Forces (out of stud)
- Metal-in-plastic combination feasible
