

## FLOWpoint DELTA PT® SCREWS

### New Thread/Point Technology for Carbon Fiber Reinforced Plastic

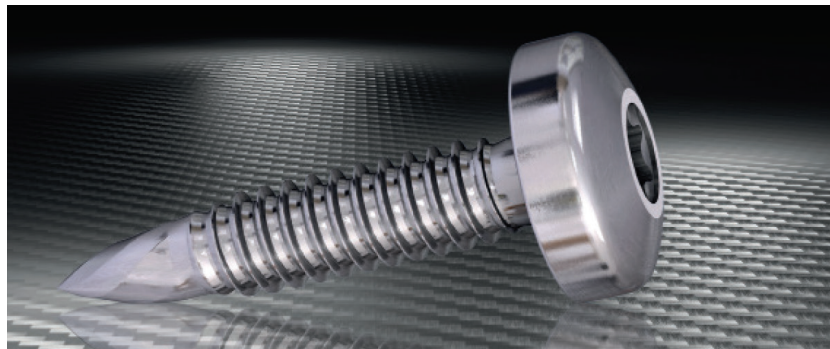

The FLOWpoint DELTA PT® screw is an innovative fastener developed to meet the challenging demands of joining highly engineered CFRP materials. It combines two proven EJOT technologies into one screw.

A self-piercing and self-tapping screw, the FLOWpoint Delta PT® penetrates both the clamped and mating material without a pilot hole. The optimized DELTA PT thread geometry forms a strong female thread in the carbon fiber reinforced plastic.

### FEATURES & BENEFITS

- ▶ No pilot hole required
- ▶ Easy disassembly and reassembly
- ▶ Optimized Delta PT thread forms strong female thread in the carbon fiber reinforced plastic
- ▶ Available with most common automotive drive systems and most head styles
- ▶ Couples a unique point feature with Delta PT Thread
- ▶ Available in stainless steel, steel and aluminum
- ▶ Hybrid joining possible (e.g. Aluminum to CFRP)
