

PUSH-ON CAPS

Perfect for Hiding Unattractive Stud Ends!

Whether you install a washer cap type high hat; colorful, plastic push-on, or overmolded cap, these decorative push-on fasteners offer product enhancement in a dependable, vibration-resistant assembly. High carbon spring steel reliability combines with an appealing feature to hide stud ends with this fast, easy solution.

TWO-PIECE DECORATIVE CAPS

Commonly used to hide unattractive stud ends. Each Push-on includes a reliable high carbon spring steel base with a plastic cap that can be colorized to match many products. Used over the shaft, stud, or rod ends for numerous applications, these Push-ons with Decorative Caps visually enhance products while providing a dependable, vibration-resistant assembly.

ONE-PIECE DECORATIVE HIGH-HAT (PW)

Commonly used over shafts, studs or rod ends to enhance any product while providing dependable, vibration-resistant assembly. These Push-ons are commonly used to secure wheels on toys, barbecue pits and more. They are also used with nameplates and many injection molded parts that feature injection molded studs.

OVERMOLDED CAPS

EFC offers a decorative, durable fastener in any color. With their dependable, vibration-resistant assembly, you can count on these overmolded caps to provide an appealing feature that hides stud ends with a fast, easy-to-use solution.
