

WIRE MANAGEMENT SOLUTIONS

Perfect for Reducing Manufacturing Costs & Weight!

EFC's wire management solutions offer the most reliable means of securing cables, wire bundles and tubing. Swivel clips, cable clips and cable straps are available in single and multi-piece designs, numerous configurations and options providing an endless array of wire management solutions. All provide self-retaining features for ease of assembly and quick installation.

FEATURES AND BENEFITS

- ▶ **Cable Straps** are the most common swivel clip component. They accommodate wire and bundle sizes from 8–52 mm, retaining wire bundles of different sizes and shapes securely.
- ▶ **Tube Clips** retain similar and consistent size wires ranging from 4.3–30 mm. Tube clips assemble much faster than cable straps.
- ▶ **Edge Biter Clips** feature inner barbs that bite into the edges of panels. The clips self-retain to panels for easy field assembly.
- ▶ **Fir Trees** retain into a hole of specified diameter and allow for easy field assembly.
- ▶ **Universal Tie Strap** is a one piece design able to accommodate a wide range of panel thicknesses and hole sizes. Special dart provides substantial holding strength but installs easily by hand.

MATERIALS

Products are made with high quality nylon and acetal materials. Additives are added to improve the strength, temperature resistance, and UV stabilization. Edge-biter components are made with spring steel.
